

# SUPER GLUE

An Ethyl Cyanoacrylate adhesive that is used for rubber/plastic bonding. Also can be used to bond a wide range of similar and dissimilar material such as plastics, metals, rubber, ceramic and glass. Medium viscosity formula for efficient wicking action, faster curing time.

**FEATURES:**

- Meets Mil. spec. MIL-A-46050B Type 1 Class 2
- Temperature Range: (-65 to 180)°F
- Highly resistant to acid, alkali, alkali water, solvents and fungus.
- **12 Months Shelf Life from D.o.M.**

**BENEFITS:**

- Strength: (2,800 - 4,300)psi
- Thinner: 10-312 or Lacquer Thinner
- Fills gaps of (.003 - .005)"
- This grade is ideal for small or fine work on non-porous, smooth surfaces.
- Non-toxic

**Product Availability:**

PART No.	DESCRIPTION	SIZE
10-120	GLUE	0.075 fl. oz.
